PRIVATE EXPERIENCE / ENGLISH

Guatín · Cactus Valley

A hike through the Guatín ravine to observe water and cacti set against the desert landscape. The full-length version is a distinct experience and should not be confused with the brief stop often made on the return journey from El Tatio.

Your itinerary

Access to the ravine

We arrive by vehicle at the designated starting point and assess the condition of the watercourse. The guide explains the route and any sections that may require the use of hands for support or extra caution while navigating the rock.

Cactus corridor

We walk along the ravine, observing how the vegetation makes the most of the available water and the terrain. Plants are never touched or damaged when approaching them for photographs.

Navigating the terrain and taking breaks

The route alternates between rocky surfaces, sandy patches, and areas near the stream. Breaks are taken for food and drink; the route can be shortened if water levels or the group's condition make it necessary.

Conclusion and return

We finish at the designated pickup point. The specific itinerary-whether the full-length version or a shorter option-and the included transportation will be specified in the booking.

DURATION

Full-length version: approximately 4 hours on foot.

DISTANCE / ROUTE

Full-length version: approximately 8 km.

EFFORT

Uneven terrain and river crossings.

MEALS

Includes a trail snack, a sandwich, and drinks, as per the itinerary.

TRANSPORT

Hotel pickup and drop-off in San Pedro (depending on location). Private transfers with stops coordinated by the guide.

PREPARATION

Requires trekking footwear and water. Please note that this 8 km route is separate from the brief stop included in the "El Tatio · Valley of the Cacti" excursion.
