PRIVATE EXPERIENCE / ENGLISH

Cornisas by E-bike

An electric bike excursion along the "Cornisas," allowing you to traverse the landscape with pedal assistance. The route and level of exertion are tailored to the group; the distances covered in the traditional hiking option do not apply here.

Your itinerary

E-bike preparation

We adjust the bike size and riding position, and check the brakes, helmets, and the use of the pedal-assist system. A brief practice session allows you to get a feel for how the bike responds before heading out onto the terrain.

Approach and cycling

The guide leads the way along the agreed-upon route, balancing climbs with breaks. While the pedal-assist system makes pedaling easier, it does not replace the need for balance, control, and experience when riding on uneven terrain.

Ledges and viewpoints

Stops are made in safe locations to take in the scenery. The group follows instructions regarding spacing and movement; please do not approach exposed edges for the sake of a photograph.

Concluding the circuit

We return to the designated meeting point and collect the equipment. The experience includes full support, transportation, and e-bikes with sufficient range for the route.

DURATION

Varies by e-bike circuit

DISTANCE / ROUTE

Route and elevation gain to be determined

EFFORT

Cycling over uneven terrain

MEALS

Water, snacks, and other meals, depending on the selected option.

TRANSPORT

Hotel pickup and drop-off in San Pedro (depending on location). Private transfers with stops coordinated by the guide.

PREPARATION

Please confirm your bicycle, size, helmet, and logistical support. This is a desert experience, not a trekking activity.
